EDUCATION

McMaster University

Bachelor of Engineering in Software (Co-op), GPA: 3.9/4.0

Hamilton, ON

Sep. 2023 – Apr. 2028 (Expected)

EXPERIENCE

Web Developer

Site4U Foundation

May 2024 - Present

Ontario, Canada

- Developed numerous web applications for up-and-coming businesses utilizing **React.js**, **Vite**, **Tailwind**, and **Azure** by creating user-friendly interfaces and fast server hosting, which increased website traffic by up to **50%**.
- Revamped various non-profit websites to enhance web traffic and user engagement.

STEM Instructor

Free for All Foundation

May 2022 – Sept 2023

Brampton, ON

- Organized and coordinated daily lessons in several topics related to Science, Technology, Engineering, and Math for more than **60** students.
- Developed a curriculum based on various modern technologies such as MIT Scratch, **Arduino**, **C++**, and more, resulting in many students gaining the ability to effectively program and engineer solutions.

Co-Captain and Lead Software Developer

10700X Vex Robotics Team

Oct 2022 – Jun 2023

Brampton, ON

- Led a Vex robotics team founded from scratch, which placed **third** provincially out of 64 teams and secured thousands of dollars in sponsorships.
- Implemented a design for the robot that improved team performance from the bottom 10% to the top **97%** of teams, achieving an **87%** autonomous success rate against other teams.

PROJECTS

GryphHacks (Volunteering Forum Webapp) - Second Place | *React, SQL, Firebase*

May 2022

- Developed an online web app allowing users to post and view volunteering events nearby, with functionality for storing earned volunteering hours.
- Utilized **leaflet.js** for map implementation, along with a local backend through **C++** and **SQL**.
- Completed in **under 48 hours** while competing against university and industry-level professionals in “GryphHacks.”
- Earned the Second Place award in a competition with over **70 participants** from around the world.

EcoHub (Eco-friendly Rewards Platform) | *React, Firebase, Google Cloud*

Aug 2024

- Developed EcoHub, an app that offers eco-friendly activities and rewards users with EcoCoins for participation.
- Utilized **React** for frontend development and **Mapbox** for interactive maps, with a **Firebase** backend.
- Included a **Blockchain-like** currency called EcoCoin, which was dynamically run through **Google Cloud**.

EduGlow (Education Webapp) | *React, AppScript, GPT-4 APIs, Python*

Jan 2024

- Created a web app allowing users to generate slideshows and flashcards.
- Utilized **AppScript** for backend API connection along with **JSON search** and **GPT-4** APIs.
- Completed in **36 hours** as part of the University of Toronto’s competition against industry professionals and students.

Rigor (Fitness Webapp) | *React, Firebase, Google Vision API, Python*

Sep 2023

- Developed a fitness web app for creating workouts and tracking macronutrients.
- Utilized a **Firebase** backend to store user accounts and host the site, along with **React** frontend and Google’s **Vision API** for image processing.
- Completed in **36 hours** as part of the University of Toronto’s competition against industry professionals and students.

SKILLS

Languages: Python, Java, C++, C, JavaScript, SQL, HTML5, CSS3

Tools/Frameworks: React, Node.js, Git, Firebase, Google Cloud, Linux, Shell Scripting, PyGame, JSON

Certifications: Harvard CS50, McMaster Engineering Competition runner-up, Databases with PostgreSQL
